## Serious facts about ONE (2008 Edition)

**Office Suites** (office productivity software) typically include: Word processor, Spreadsheet, Presentation application, Database management, Contact Management and Electronic e-mail and appointment manager. The most well-known of these office productivity solutions is Microsoft® Office and then there are the other free / open source options such as OpenOffice®.

**New Trend.** A growing number of product analysts all over the world recommend ONE as *the only serious alternative office suite*. Why?

Market research shows that:

- 80% of PC users requiring **office suites** only use word processors, spreadsheets, web browsers and e-mail.
- 5% of PC users are individual / home / small business users who put a high premium on cost (affordability), ease of use (user friendly), reliability (quality) and speed (efficiency).
- Research done by ONE show that globally this market is growing by about 10% a year. By 2010 there will be a demand of between 2 – 3 billion users requiring office suites.
- Many users in developing economies (such as South Africa and Africa) need to work with and communicate with businesses in first world economies – therefore, requiring a low-cost, but high quality **office suite** solution.

ONE's **Market Focus**. ONE is the ideal alternative **office suite** for:

- Home users
- Businesses
- Learning institutions - universities, technical colleges, schools
- NGO's
- Training centers and Call centers - especially where low level of computer literacy is an entry requirement.
- Youth – ONE's unique products such as Author **Junior** and Numerics **Junior** are developed for helping children with basic computing skills
- Professional software developers – e.g., see ONE's Library solutions for web tools

### About ONE

In the past 10 years the ONE **office suite** has grown its customer base all over the globe. ONE is being developed and actively maintained (regular upgrades) by the North American company e-Press. ONE's long standing track-record and international backing is locally supported by ECI ([www.ecizone.com](http://www.ecizone.com))

ONE's challenge to you is to find a better, Microsoft compatible, alternative **office suite** than this ONE
